Smile Lines: Great Inventions:

The boys had been up in the attic together helping with some cleaning. They uncovered an old manual typewriter and asked their mother what it was. She briefly explained, but they were still puzzled as to how it worked. "I'll show you" she said, and returned with a blank piece of paper. She rolled the paper into the typewriter and began striking the keys, leaving black letters of print on the page. "WOW!" they exclaimed, "that's really cool...but how does it work like that. Where do you plug it in?" "There is no plug" she answered, "It doesn't need a plug." "Then where do you put the batteries?" they persisted. "It doesn't need batteries either" she continued. "Wow this is so cool" they exclaimed "Someone should have invented this a long time ago!"
